

Ürün tanımı

Preparing machines and systems for faster startup: e!COCKPIT the new engineering software shortens development time for automation projects while impressing with a modern and clearly laid out user interface. At the software's core is CODESYS V3, which provides the simple and versatile creation of applications.

Ensuring a project's long-term viability through sustainable cost savings hinges on a user's ability to quickly adapt to new software that offers a high degree of reusability. This sharpens your competitive edge by reducing your time to market.

WAGO set out to fulfill these exact requirements by developing its own engineering software: e!COCKPIT. This integrated development environment supports every automation task from hardware configuration, programming, simulation and visualization up to commissioning — all in one software package.

Use the programming tool to cover all important automation bases while simultaneously engineering particularly complex projects quickly and easily.

Configuration and Parameterization

The integrated e!COCKPIT configurators provide modern operating tools and workspaces, such as:

- Graphical network topology: Complex dependencies between network participants and their current states are easily and intuitively accessed.
- Drag & Drop: Simplifies interaction with devices.
- Copy & Paste: Individual devices or whole network branches can be duplicated quickly.
- Batch processing: Parameter values are set simultaneously for several devices.

Programming

e!COCKPIT offers multiple software development options:

- IEC 61131-3 PLC programming languages: Structured Text (ST), Ladder Diagram (LD), Function Block Diagram (FBD), Instruction List (IL), Sequential Function Chart (SFC), Continuous Function Chart (CFC)
- For flexibility, all programming languages can be combined with one another.
- Created programs can be easily debugged on the engineering PC via simulation.
- New paradigms such as object-oriented programming are included.

Visualization

Advanced user interfaces for operating and monitoring machines are standard. Today, HMI-based design is a critical factor that influences the purchase of an entire automation line. e!COCKPIT employs Drag & Drop to streamline the design of modern user interfaces. The integrated visualization editor provides:

- Access to IEC program variables.
- Closed simulation of HMI and PLC program on the engineering PC.
- Guaranteed language independence via Unicode character set.
- Current standards such as HTML 5 or CSS.

Diagnostics

Being acutely aware of the automation network's current status is an absolute must for the rapid detection and elimination of errors — be it during development in the office or directly on the machine during commissioning.

e!COCKPIT provides comprehensive diagnostic capabilities:

- Individual views always display the controllers' status information, for example, both graphically and in tabular form.
- To keep project on time, error messages are transmitted directly and clearly.
- The structured wiring test function systematically identifies wiring errors.

Note:

Veri

System requirements

Supported operating systems	Windows 7 (32- and 64-bit) Windows 8 Windows 8.1 (32- and 64-bit) Windows 10
İşlemci	Core2Duo
RAM bellek	4 GB
Hard disk storage	min. 9.77 GB
Ekran çözünürlüğü	1,366 x 768 px

Software data

Supported devices	Controllers based on CODESYS 3;; I/O modules (750/753)
Supported fieldbuses	CANopen, MODBUS TCP/UDP, MODBUS RTU, PROFIBUS
Supported device descriptions	DTP, EDS, GSD
Connectivity	TCP, USB, OPC, CODESYS network variables, CODESYS DataServer
Programming languages per IEC 61131-3	ST, LD, FBD, IL, FC, CFC
Import/export formats	CODESYS 3 project files (*.project)

Delivery

License type	Buy-out license
Delivery type	Installation file (download)
License type note	Buy-out license: Allows the installation of an unlimited number of licenses in one company at all company sites. In addition the software may be used in all products produces by the company that contain WAGO automation technology and therefore form a functional unit.
License type note (2)	Internet connection may be required for license activation.

eCOCKPIT application note WagoSolElsner This application note describes how communication can be set up between the WAGO I/O System and the ELSNER P03/3 weather station with a Modbus interface.	2019-09-16 Sep 16, 2019	pdf 915,7 kB	İndir
e!COCKPIT application note WagoSolHKW The Application Note explains how communication between the WAGO-I/O-SYSTEM and an HKW electronic weather forecast station (compact) can be established.	2019-09-09 Sep 9, 2019	pdf 1,0 MB	İndir
eCOCKPIT application note WagoAppDatalogger This application note describes the use of the WagoAppDatalogger. Up to 160 analog or digital signals can be recorded.	2019-09-09 Sep 9, 2019	pdf 1,8 MB	İndir
e!COCKPIT Anwendungshinweis ToPass The TO-PASS® application (750-8207) makes it possible to send error messages via SMS and transfer the process data to an Internet portal via HTTP (e.g., www.to-pass.com).	2018-04-20 Apr 20, 2018	zip 79,7 MB	İndir
eCOCKPIT application note WagoAppEnOcean This application note describes how communication between the WAGO-I/O-SYSTEM and different EnOcean wireless sensors can be implemented using the WagoAppEnOcean library.	2019-09-09 Sep 9, 2019	pdf 1,2 MB	İndir
e!COCKPIT Anwendungshinweis: Wago Cloud IO-Connector The "WAGO Cloud-I/O-Connector" application automatically identifies the process image on the local bus and creates a tag configuration for the communication with the WAGO cloud. The application is transferred to a PFC (750-8207) via SD card as an executable image. The application is parameterized via Web visualization.	V 1.0.1 Mar 2, 2018	zip 74,8 MB	İndir
e!COCKPIT application note Mobotix This application note describes how communication between the WAGO I/O System and a Mobotix IP video camera with PoE+ (Power over Ethernet) (TCP/IP) interface is realized.	2019-09-09 Sep 9, 2019	pdf 2,9 MB	İndir
e!COCKPIT Application Note WAGO Gateway Application The WAGO Gateway Application for the WAGO 750-8212 PFC200 2nd Generation enables communication between different bus and/or communication systems and shortens the integration time. The user-friendly web interface allows the user to exchange information and measured values between different systems. The pre-configured application shortens startup times, especially in building technology. The WAGO Gateway Application currently enables communication with Modbus RTU, Modbus IP (TCP/UDP) and KNX-TP devices. Every conceivable combination is possible.	V 1.0.0.0 Apr 25, 2019	pdf 8,7 MB	İndir
