| unslotted                                   | 210-113  | 76          | 16/6                            |
| DIN 35 x 15 (steel)                         |          |             |                                 |
| 1.5 mm thick                                | 210-114  | 125         | 35/2                            |
| 2.3 mm thick                                | 210-118  | 125         | 35/2                            |
| DIN 35 x 7.5 (Al)                           |          |             |                                 |
| unslotted                                   | 210-196  | 76          | 16/6                            |
| DIN 35 x 15 (Cu)                            |          |             |                                 |
| 2.3 mm thick                                | 210-198  | 309         | 150/6/0                         |
| Current applies to rails of 1 m/3'3" length |          |             |                                 |

When using standard carrier rails as ground conductor busbars, please refer to the maximum current capacities listed above.

Steel carrier rails are not suited for PEN (ground and N-conductor) applications per EN 60947-7-2 (VDE 0611, Part 3).

Değişikliklere tabidir.
