#### **DATASHEET - OPTB9**

# Output expansion 1RO(NO) 5DI(42-240 VAC) for variable frequency drives SVX and SPX

Part no. OPTB9 Catalog No. 125064 Alternate Catalog OPTB9

No.

**EL-Nummer** 4132607

(Norway)

## **Delivery program**

Subrange	Output expansion
Description	The expansion module is plugged into the variable-frequency drive. 1 relay output (NO) 5 digital inputs (42 - 240 V AC)
For use with	SVX, SPX

### **Design verification as per IEC/EN 61439**

Design verification as per IEC/EN 61439			
IEC/EN 61439 design verification			
10.2 Strength of materials and parts			
10.2.2 Corrosion resistance	Meets the product standard's requirements.		
10.2.3.1 Verification of thermal stability of enclosures	Meets the product standard's requirements.		
10.2.3.2 Verification of resistance of insulating materials to normal heat	Meets the product standard's requirements.		
10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects	Meets the product standard's requirements.		
10.2.4 Resistance to ultra-violet (UV) radiation	Meets the product standard's requirements.		
10.2.5 Lifting	Does not apply, since the entire switchgear needs to be evaluated.		
10.2.6 Mechanical impact	Does not apply, since the entire switchgear needs to be evaluated.		
10.2.7 Inscriptions	Meets the product standard's requirements.		
10.3 Degree of protection of ASSEMBLIES	Does not apply, since the entire switchgear needs to be evaluated.		
10.4 Clearances and creepage distances	Meets the product standard's requirements.		
10.5 Protection against electric shock	Does not apply, since the entire switchgear needs to be evaluated.		
10.6 Incorporation of switching devices and components	Does not apply, since the entire switchgear needs to be evaluated.		
10.7 Internal electrical circuits and connections	Is the panel builder's responsibility.		
10.8 Connections for external conductors	Is the panel builder's responsibility.		
10.9 Insulation properties			
10.9.2 Power-frequency electric strength	Is the panel builder's responsibility.		
10.9.3 Impulse withstand voltage	Is the panel builder's responsibility.		
10.9.4 Testing of enclosures made of insulating material	Is the panel builder's responsibility.		
10.10 Temperature rise	The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.		
10.11 Short-circuit rating	Is the panel builder's responsibility. The specifications for the switchgear must be observed.		
10.12 Electromagnetic compatibility	Is the panel builder's responsibility. The specifications for the switchgear must be observed.		
10.13 Mechanical function	The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.		

#### **Approvals**

Product Standards  UL File No.  E134360  UL Category Control No.  CSA File No.  UL report applies to both US and Canada  North America Certification  Specially designed for North America  Suitable for  UL 508C; CSA-C22.2 No. 14; IEC/EN61800-3; IEC/EN61800-5; CE marking  E134360  NMMS, NMMS2, NMMS7. NMMS8  UL report applies to both US and Canada  UL listed, certified by UL for use in Canada  No  Suitable for  Branch circuits	- PPI - C
