## DATASHEET - MSC-R-12-M12(230V50HZ)/BBA

Reversing starter, 380 V 400 V 415 V: 5.5 kW, Ir= 8 - 12 A, 230 V 50 Hz, 240 V 60 Hz, AC voltage

Powering Business Worldwide

MSC-R-12-M12(230V50HZ)/BBA Part no.

102991 Catalog No.

XTSR012B012BFNL-A **Alternate Catalog** 

No.

**EL-Nummer** 4315452

Complete units with mechanical interlock, starters up to 12 A also feature electrical interlock.

| Notes   |                          |              |  |  |
| The reversing starter (complete units) consists of a PKZM0 motor prot   | ective circuit breaker a | and two DILM | 1 contactors.  |  |
| These combinations are mounted on the busbar adapters.  |                          |              |  |  |
| The connection of the main circuit between the motor protective circuit breaker and the contactor is established with an electrical contact module. |                          |              |  |  |
| <u> </u>  |                          |              |  |  |

## Design verification as per IEC/EN 61439

| Jesign verification as per IEC/EN 61439   |                   |    |  |
|---|-------------------|----|--|
| echnical data for design verification   |                   |    |  |
| Rated operational current for specified heat dissipation  | In                | Α  | 12   |
| Heat dissipation per pole, current-dependent  | P <sub>vid</sub>  | W  | 3.1  |
| Equipment heat dissipation, current-dependent   | P <sub>vid</sub>  | W  | 9.3  |
| Static heat dissipation, non-current-dependent  | $P_{vs}$          | W  | 1.4  |
| Heat dissipation capacity   | $P_{\text{diss}}$ | W  | 0  |
| Operating ambient temperature min.  |                   | °C | -25  |
| Operating ambient temperature max.  |                   | °C | 55   |
| EC/EN 61439 design verification   |                   |    |  |
| 10.2 Strength of materials and parts  |                   |    |  |
| 10.2.2 Corrosion resistance   |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.1 Verification of thermal stability of enclosures  |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat  |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects $$ |                   |    | Meets the product standard's requirements.                         |
| 10.2.4 Resistance to ultra-violet (UV) radiation  |                   |    | Meets the product standard's requirements.                         |
| 10.2.5 Lifting  |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.2.6 Mechanical impact  |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.2.7 Inscriptions   |                   |    | Meets the product standard's requirements.                         |
| 10.3 Degree of protection of ASSEMBLIES   |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.4 Clearances and creepage distances  |                   |    | Meets the product standard's requirements.                         |
| 10.5 Protection against electric shock  |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.6 Incorporation of switching devices and components  |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.7 Internal electrical circuits and connections   |                   |    | Is the panel builder's responsibility.                             |
| 10.8 Connections for external conductors  |                   |    | Is the panel builder's responsibility.                             |
| 10.9 Insulation properties  |                   |    |  |

| 10.9.2 Power-frequency electric strength                 | Is the panel builder's responsibility.   |
|--|--|
| 10.9.3 Impulse withstand voltage                         | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material | Is the panel builder's responsibility.   |
| 10.10 Temperature rise                                   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
